

amaysim Guide to MMS Settings for Samsung & other Android V4.x and above

amaysim Guide to MMS Settings for Samsung & other Android V4.x and above

Here's a guide to set-up MMS on your Android mobile. Just follow these easy steps. Before you start, you may need your handset user manual. If you don't have a copy, you can find it online. Search manufacturer's name, model of your handset & user manual (e.g. Samsung Galaxy X user manual).

As there are a few different versions of Android in the market, we have come up with the basic steps required to get you up and running with the internet. You may notice your mobile's screen will not match the screen shots we have in this guide, but this guide will still assist you with the steps and information you require.

Some key terms

What do we mean by '**TAP**' and '**PUSH**'? '**TAP**' means using your touch screen. '**PUSH**' means pushing the hard buttons on your phone.

What is **APN**? **APN** stands for Access Point Name. Setting up the APN on your handset will let you access the internet using your mobile phone.

STEP 1

[Check your software version here.](#)

STEP 2

Let's set up your MMS!

1. Tap the APPS ICON

2. Tap SETTINGS

3. Tap MORE SETTINGS

4. Tap MOBILE NETWORKS

5. Tap ACCESS POINT NAMES

6. You should see the following if you already have the internet settings installed. If not then please do this first.

7. Tap the **MENU** key that's at the bottom of the phone.

8. Tap **NEW APN**
You will see your previous provider's settings at this step. Once you complete the steps you will see amaysim settings

9. Tap **NAME** and type in **amaysim mms** (not case sensitive)

10. Tap **APN** and type in **mms** (all lower case)

16. Tap
**AUTHENTICATION
TYPE** and **PAP**

17. Tap **APN TYPE**
and type in **MMS**
(all lower case)

18. Tap the **MENU**
button at the
bottom of the screen

19. Tap **SAVE**

20. This is what you
should see once
finished.
